Criar um internet gateway para permitir conexão do VPC à internet

igw-0bfd42a548b927c73

ⓘ 🗨

🕒

The following internet gateway was created: igw-0bfd42a548b927c73 - igw-bia. You can now attach to a VPC to enable the VPC to communicate with the internet.

Attach to a VPC ✕

Neste route table, criar uma nova rota (0.0.0.0) que se conecta ao internet gateway bem como associar o route table às subnets criadas

Criar IAM Role para acesso SSM

✔ Role Role-SSM-BiaDev created.

View role

✕

Roles (17) [Info](#)

↺

Delete

Create role

An IAM role is an identity you can create that has specific permissions with credentials that are valid for short durations. Roles can be assumed by entities that you trust.

Q BiaDev

Roles Anywhere [Info](#)

Manage

Authenticate your non AWS workloads and securely provide access to AWS services.

Access AWS from your non AWS workloads

Operate your non AWS workloads using the same authentication and authorization strategy that you use within AWS.

X.509 Standard

Use your own existing PKI infrastructure or use [AWS Certificate Manager Private Certificate Authority](#) to authenticate identities.

Temporary credentials

Use temporary credentials with ease and benefit from the enhanced security they provide.
